

MILTECH 718

Ultra Compact 8 x 1GbE Embedded Military Board Level Ethernet Switch

One of the most exciting advancement in technology over the last decade has been unmanned vehicles including:

- Unmanned aerial vehicles (UAVs) or Drones
- Land autonomous vehicles (UGVs)
- Robots
- Other unmanned support vehicles

These vehicles must be agile, compact and highly intelligent. In order to support this sophisticated intelligence, these platforms may have to carry and connect a variety of Ethernet-based devices including computers, sensors, and targeting systems - all in compact platforms that must operate in extreme environmental conditions.

The MILTECH718 is a rugged, cost-effective, ultracompact board-level Ethernet switching solution (70x40mm). Equipped with 8GbE 10/100/1000Mbps ports, this board - level switch is ideal for integrating system level solutions through board-to-board connectors.

The MILTECH718 consumes only 5W of power and uses 9-32VDC. Its ruggedized design feature mechanical packaging enhancements designed for MILSTD-461E, MILSTD-810F/G and IP68 compliance when installed in an appropriate enclosure.
