

MILTECH™ 9117 TSN

8 x 1G + 4 x 100M/1G/10G + 4 x 1/10G F/O Ethernet L2/L3 switch with Full TSN and Input/Output clocks With Cisco® IOS® - XE 8000V using powerful SBC

MILTECH 9117 TSN is a member of the super-speed ethernet switches, aimed at providing advanced timing solutions for military applications on top of a standard Ethernet switch.

Providing 8 x 10/100/1000BT ports, 4 x 100M/1G/10G, 4 x 1/10G F/O, 1PPS, and 10MHz (In and Out), this switch is designed to support networking and precise timing applications such as manned/autonomous vehicles, Avionics, UAVs, and mobile equipment in battlefield environments supporting super-speed networking and time precision.

MILTECH 9117TSN supports advanced Time-Sensitive Networking (TSN) features, including Time-Aware Shaper (TAS), Frame Preemption, and Per-Stream Filtering and Policing (PSFP). These capabilities ensure deterministic data delivery and low-latency communication, which is essential for real-time military applications.

The integrated Cisco 8000V router transparently connects to a mobile world of wired and wireless networks, with IPv4/IPv6 routing and multicast protocols that include BGP, OSPF, GRE, EIGRP, CDP, IGMP and MLD. Voice and video connection quality is maintained with advanced quality of service (QoS) while external communications is secured with the latest encryption algorithms, IPsec and IKEv2 protocols, authentication, identity management, and integrated threat management. These advanced functions normally require a separate edge router but are now available in our compact MILTECH 9117 TSN.

The switch's hardware-based timestamping and synchronization mechanisms, compliant with IEEE 802.1AS and IEEE 802.1Qbv standards, enable precise time coordination across networked devices. The MILTECH 9117 TSN's support for multiple timing domains and seamless integration with existing network infrastructure make it a versatile solution for complex, mission-critical environments.

MILTECH 9117 TSN is ideal for deployment in the most challenging military environments. Equipped with MIL circular connectors that meets the NGVA standards and durable enclosure, the MILTECH 9117 TSN is designed to withstand harsh conditions with ease.

MILTECH 9117 TSN design to meet the IP67, MIL-STD-810: thermal, shock, vibration, altitude, humidity and MIL-STD-461 EMI/EMC.

Wide range of DC input (18-48VDC) and MIL-STD-1275/704 power supply allows easy integration in existing and new solutions.

The durable design, flat mounting surface, and RoHS / REACH Compliance make the MILTECH 9117 TSN suitable for almost any application.
