

M8747 SERIES DC/DC POWER SUPPLY

PRODUCT HIGHLIGHTS

- MINIATURE
- HIGH DENSITY
- QUAD OUTPUT
- DC/DC CONVERTER
- UP TO 100W

Milpower Source, Inc. • Belmont, NH, **USA** • P: (603) 267-8865 Email: sales@milpower.com • Website: www.milpower.com • CAGE: 5YWX2

Doc: DS_M8747 Series | Rev g | Jan 31, 2024

Applications

Military, Ruggedized, Telecom, Industrial

Special Features

- Miniature size
- High efficiency
- Wide input range
- Up to 15 W/IN³
- Input / Output isolation
- Fixed switching frequency (250 kHz)
- TTL logic enable
- EMI filters included
- Indefinite short circuit protection with auto-recovery
- Input over-voltage shutdown with auto-recovery
- Over temperature shutdown with autorecovery

Environmental Conditions

Meets or exceeds MIL-STD-810D

Temperature:

Operating -55°C to +85°C (baseplate) Storage -55°C to +125°C

Altitude

Method 500.4

Procedures I – Storage/Air transport: Up to 70,000 ft. (non-operational) Procedures II – Operation/Air Carriage: Up to 70,000 ft. (operational)

Reliability

150,000 hours, calculated per MIL-STD-217F at +85°C baseplate, ground fixed.

Electrical Specifications

DC INPUT

DC Input range: 18 to 48 VDC

Input transient protection:

All models meet or exceed (no damage)
MIL-STD-1275A (100V for 50 mSec) and
MIL-STD-704A/D (80V for 0.1 Sec)
Over-voltage shutdown with auto-recovery

Efficiency: Up to 82%

EMC:

Designed to meet* MIL-STD-461F CE101, CE102, CS101, CS114, CS115, CS116, RE101, RE102, RS101, RS103

Isolation:

200V between Input and Output 200V between Input and Case

DC OUTPUT (floating)

Line/Load regulation:

Less than $\pm 1\%$ (no load to full load, -55° C to $+85^{\circ}$ C)

Ripple and Noise: 50mV_{p-p}, typical (max. 1%)

Current limiting (Foldback):

Continuous protection for unlimited time

Over voltage protection:

Passive transorb on output.

Over temperature protection:

Shutdown at baseplate temperature of +100°C (±5°C) Automatic recovery at baseplate temperature lower than +90°C (±5°C)

Isolation:

100V between Output and Case

* EMC compliance achieved when tested with 5 μH LISNs, shielded harness and static resistive load.

40	+ OUT 2

Functions and Signals

INHIBIT signal

The INHIBIT signal is used to turn the power supply ON and OFF.

TTL "1" or OPEN – will turn on the power supply (For normal operation leave the signal not connected).

TTL "0" or short– will turn off the power supply.

SYNC signal

The SYNC signal is used to allow the power supply frequency to sync with the system frequency.

The system frequency should be 250 kHz ± 10 kHz.

When not connected the power supply will work at 250 kHz \pm 10 kHz.

SIGNAL RTN

The SIGNAL RTN is used as a return path for SYNC and INHIBIT signals.

This pin is referenced to VIN RTN.

OUT 1 SENSE

The SENSE is used to achieve accurate load regulation at load terminals. This is done by connecting the pins directly to the load terminals.

The remote sense correction function is limited to voltage drop between converter's output and load terminals of 2% to 5%, or up to 0.5V, the least of the two.

When not used, connect OUT 1 SENSE to OUT 1 and - OUT 1 SENSE RTN to - OUT 1.

Do not leave SENSE and SENSE RTN pins unconnected. These pins can be tied internally to avoid external connection, if function is not required – consult factory

OUT 2 SENSE

The SENSE is used to achieve accurate load regulation at load terminals. This is done by connecting the

pins directly to the load terminals. The remote sense correction function is limited to voltage drop between converter's output and load terminals of 2% to 5%, or up to 0.5V, the least of the two.

When not used, connect OUT 2 SENSE to OUT 2 and - OUT 2 SENSE RTN to - OUT 2

Do not leave SENSE and SENSE RTN pins unconnected. These pins can be tied internally to avoid external connection, if function is not required – consult factory.
